ABOUT ME:

Technically driven professional with experience across IT support, system administration, and backend development. Skilled in building and maintaining internal systems, automating operational workflows, and resolving technical issues efficiently. Strong proficiency in Python and Java, with working expertise in C++, web technologies, and modern frameworks, backed by a results-oriented approach and immediate execution focus.

EXPERIENCE:

Web Development & AI (Teaching Assistant)

KidoCode Sdn. Bhd. | May 2023 – Aug 2023

- **Delivered** hands-on **IT** and **electronic systems** support, including basic **hardware** and **software** maintenance in office and operational environments.
- **Assisted** users with system access, **task execution**, and **issue resolution** across internal platforms and tools.
- **Supported** monitoring of **system functionality** and **availability** to **maintain** uninterrupted daily operations.
- **Validated** digital **content**, **course materials**, and **user-submitted** tasks prior to deployment and use.
- **Prepared** structured **documentation** and **feedback** reports related to system usage, task reviews, and technical activities.
- **Supported development** and **maintenance** of digital learning content for internal courses and platforms.
- **Assisted** in **organizing** and **facilitating** internal workshops and technical training sessions.
- **Collaborated** closely with **team members** to support **ongoing projects**, **meetings**, and **operational activities**.

TECHNICAL SKILLS:

Programming & Development: Python | Java | C++ | C# | Flask | Django | HTML | CSS | JavaScript | NLP | TensorFlow

IT Support & Systems: IT Helpdesk Support | System & Application Troubleshooting | Technical Support | User Assistance

Data & Backend: SQL | Database Design & Queries | Microsoft Access | Data Analysis | Excel | ORM (SQLAlchemy) | REST APIs

Web & UI: Bootstrap, Jinja2, Frontend Integration, Templated Views

Administrative & Operations: Reporting | Documentation | Scheduling | Live Event Support | Front Desk Operations | Call Handling | Visitor Coordination

Professional Skills: Communication | Team Collaboration | Time Management | Fast Learner | Documentation | Data Entry

Languages: English | Urdu | Arabic | Hindi

PROJECTS:

Budget Management System

Java | **Android Studio** | **Firebase**

- Developed an Android-based budget management application enabling users to track income, expenses, and savings goals in real time.
- Implemented Firebase authentication and cloud database integration for secure data storage and synchronization.

Inventory Management System

C# | **Visual Studio**

- Built a desktop-based inventory management system to manage stock levels, product records, and inventory updates efficiently.
- Designed structured data handling and validation logic to ensure accuracy and reduce manual inventory errors.

Library Management System

Java | **Microsoft Access**

- Created a library management system to manage book records, member information, and issue/return workflows.
- Integrated database operations to support search, availability tracking, and record maintenance.

Applicant Tracking System (ATS)

Python | **NLP** | **Streamlit**

- Developed an ATS application using NLP techniques to analyze and rank resumes based on job requirements.
- Implemented an interactive Streamlit interface for resume upload, scoring, and candidate shortlisting.

Automated Market Sentiment Monitoring & Alert System

Python | **REST APIs** | **NLP (VADER)** | **Telegram Bot API**

- Built an automated system to fetch financial and crypto news, perform sentiment analysis, and classify market sentiment.
- Integrated Telegram Bot API to deliver real-time sentiment alerts and market updates to users.

Employee Management System

Python (Flask) | **SQLAlchemy** | **HTML** | **CSS** | **Bootstrap** | **JavaScript**

- Developed a full-stack web application for centralized employee record management and internal operations.
- Implemented authentication, session management, and CRUD functionality with a relational database backend.

Workflow Automation & Approval Engine

Django | **Python** | **RBAC** | **State Machine Logic** | **Django ORM**

- Designed a workflow automation system with role-based access control and multi-level approval processes.
- Implemented state machine logic to manage approval transitions and enforce business rules.

Project Management API

FastAPI | **Python** | **SQLite** | **SQLAlchemy** | **Jinja2** | **Authentication** | **CRUD**

- Developed a RESTful Project Management API supporting authentication and full CRUD operations.
- Applied ORM-based database design and server-side templating for structured data handling and extensibility.

Data Anonymization Service

FastAPI | **Python** | **pytest** | **PII Detection** | **Masking** | **Audit Logging** | **Rule-Based Pipeline**

- Developed a Python-based API to detect, anonymize, and mask sensitive personal information (PII) in structured and unstructured data.
- Implemented rule-driven anonymization strategies (Mask, Partial Mask, Hash, Redact) with modular pipeline design and audit logging for compliance.

(Project repositories and demos available via portfolio links)

EDUCATION:

Bachelor of Information Technology (Software Engineering) (Hons.)

SEGi University, Malaysia | CGPA: 3.38

Diploma in Information Technology

SEGi University, Malaysia | CGPA: 3.69

CERTIFICATIONS:

- Full Stack Java Development (2025)
- Python Libraries (2025)
- CompTIA Cloud+ Basic (2025)
- Salesforce Administrator (2025)
- Professional Accreditation Program | Saudi Arabia (2025)
- Quality Assurance (QA): Techniques & Methodologies (2025)
- Data Visualization Using Python (2024)
- SEO for Beginners (2024)
- Dean's List Certificates (2019, 2020, 2021)
- Student Representative Council (SRC), SEGi University (2020 – 2021)
