About Me:

Motivated IT graduate with experience in **IT** and **electronic systems** support within an organizational environment. Experienced in providing user technical assistance, supporting hardware and software operations, validating digital content, and maintaining technical documentation. **Proficient** in Python, C++, HTML, and CSS through practical internship tasks and **projects**, with experience supporting internal platforms, workshops, and **technical** activities. **Detail-oriented**, reliable, and adaptable, seeking entry-level IT support or technical roles with opportunities for continued learning and professional growth.

Experience:

Web Development and AI (Teaching Assistant) | Kidocode Sdn. Bhd. | May 2023 - Aug 2023

- Provided **IT** and **electronic systems** support, including basic hardware and software maintenance on-site office and operational environments.
- Assisted users with **system access**, **task execution**, and **technical issues** related to internal platforms and tools.
- Supported **monitoring** of system **functionality** and **availability** to ensure smooth daily operations.
- Validated **digital content**, **course materials**, and user-submitted tasks prior to **deployment** and **usage**.
- Prepared **documentation** and **feedback reports** related to **system usage**, task reviews, and **technical** activities.
- Supported the **development** and **maintenance** of digital content for internal courses and learning platforms.
- Assisted in **organizing** and **facilitating** internal web department workshops and technical training sessions.
- **Collaborated** with team members during meetings and **technical activities** to support ongoing projects and operations.
